To Whom It May Concern:

RE: Adrian Enterprises

Please consider this our unqualified recommendation for Marty Adrian and his team at Adrian Enterprises. Adrian performed the Electrical and Fire Alarm subcontracts for the Del Mar Performing Arts Addition. The project began in May 2011 and was completed in April 2012. The contract value was \$999,609.00. Adrian also performed required warranty work satisfactorily after the 1-Year Walk-Through in May of 2013.

The job was fully staffed with competent manpower. Performance was timely, and there were no quality issues during or after the project.

The Performing Arts Addition project was a 10,416,295 square foot addition to the existing Fine Arts building at Del Mar College, Corpus Christi, TX. In addition to coordination with existing building systems, the project scope included specialized theater systems, film lab, auditorium, shop spaces, public and back of house support rooms, practice rooms, shop rooms, and classrooms. Please feel free to contact me with any questions.

Sincerely,
